edited by parthasarathi shome this handbook was written primarily for economists who are responsible for analyzing and evaluating economic policies of developing countries at an applied level and who would benefit from a comprehensive discussion of the concepts principles and prevailing issues of taxation

china and the asean region have risen rapidly to a position of immense economic significance in the global economy academics policy makers and businesses are all keen to understand more about taxation in china and asean and this work seeks to address this key issue by providing a comprehensive overview of the many often mentioned but little understood challenges of doing business in the region traversing a wide range of regional issues and jurisdictions topics covered include the role of dtas in regional integration the impact of social institutions on tax corruption and its causes economic development and taxation and the use of education in developing systems case studies are taken from countries such as china vietnam hong kong singapore the philippines malaysia and indonesia drawing on the results of these discussions the book also sheds light on the question of whether different taxing institutions are needed in the region gathering together a cross disciplinary group of eminent scholars this

work will be of great interest to all students and scholars of asian economics asian finance and taxation in general

martin enevoldsen s book is a pioneering work that compares the impacts of various non regulatory environmental strategies in achieving measurable pollution reductions much has been written on the theoretical virtues and drawbacks of green taxation versus the adoption of voluntary agreements when it comes to effective implementation of environmental goals in convincing detail this book makes the case for the effectiveness of environmental taxation its barriers being primarily political in nature rather than economic green taxes are highly controversial even in the most environmentally conscious nations particularly when they are regarded as a purely fiscal instrument the successful danish co2 taxation on industry which this study proves to be much more effective than the dutch system of voluntary agreements or the austrian laissez faire policies relied not only on the inducement of the co2 tax itself all of the tax revenue was ploughed back into industry as subsidies for investments in advanced energy saving technologies martin enevoldsen s book is simply a must for political scientists environmental economists and environment policymakers svend auken m p and former danish minister for environment and energy although there is a huge demand for accurate analysis of environmental policy outcomes in both the academic and policy making communities there is currently very little theoretical research on this issue this ambitious book redresses the balance by constructing a new theoretical framework at the crossroads between economics and political science to account for the effectiveness of environmental governance drawing on insights from new institutional economics environmental economics collective action theory and social capital theory the author analyses how policy outcomes are influenced by institutional factors that constrain and empower the target groups of environmental regulation

as well as volume one of this introductory taxation book provides the basis for the first course in federal taxation the book conveys the complexities of the tax concepts and individual tax codes and provides comprehensive and authoritative coverage of the relevant code and regulationsall major developments in federal taxation
